

# programming for testers

testing with JavaScript, Mocha and Chai

Erik Haartmans  
Martijn Thiele

# Agenda

- Finalizing laptop setup
- Create test with JavaScript
  - Using Mocha and Chai
- Create RESTful API test
- Create Selenium webdriver test

# Required, otherwise you can't start ...

- Hardware
  - Laptop with wifi
- Installed software
  - Visual Studio Code
  - Node.js >= 8.6
  - Chrome browser >= v60
- Slack account

# Workshop will be at high speed!

- Because we only have 2 hours
- It's not a complete course
- We want to cover 2 topics
  - RESTful API testing
  - Selenium webdriver testing
- We use **github gists** during the workshop

# Steps to be taken now . . .

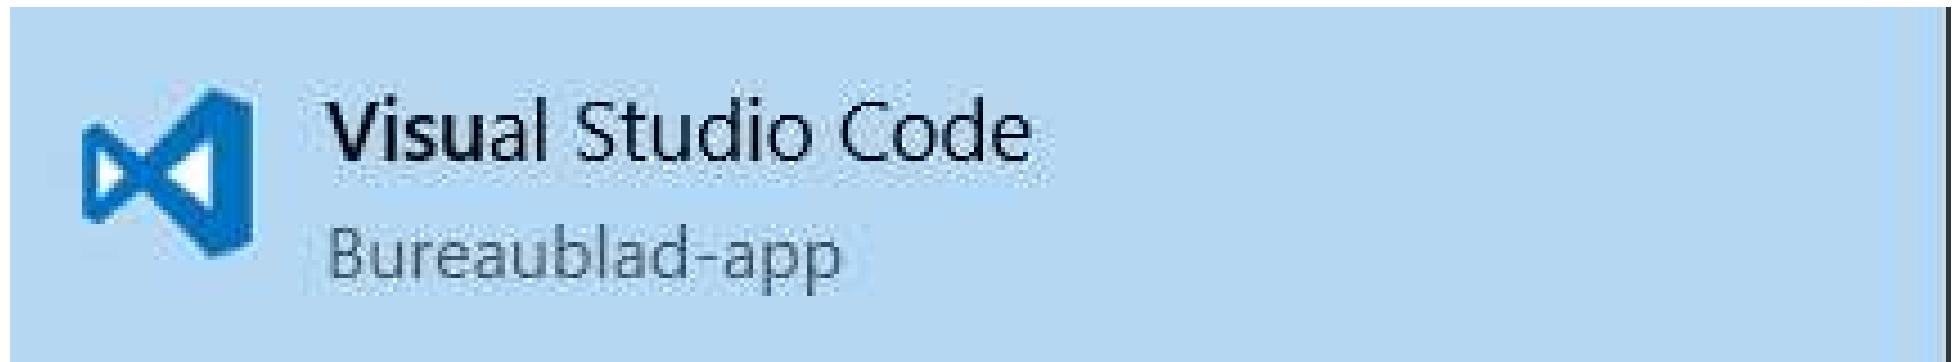

- Connect to wifi
  - SSID:
  - UN:
  - PW:

# create test development folder

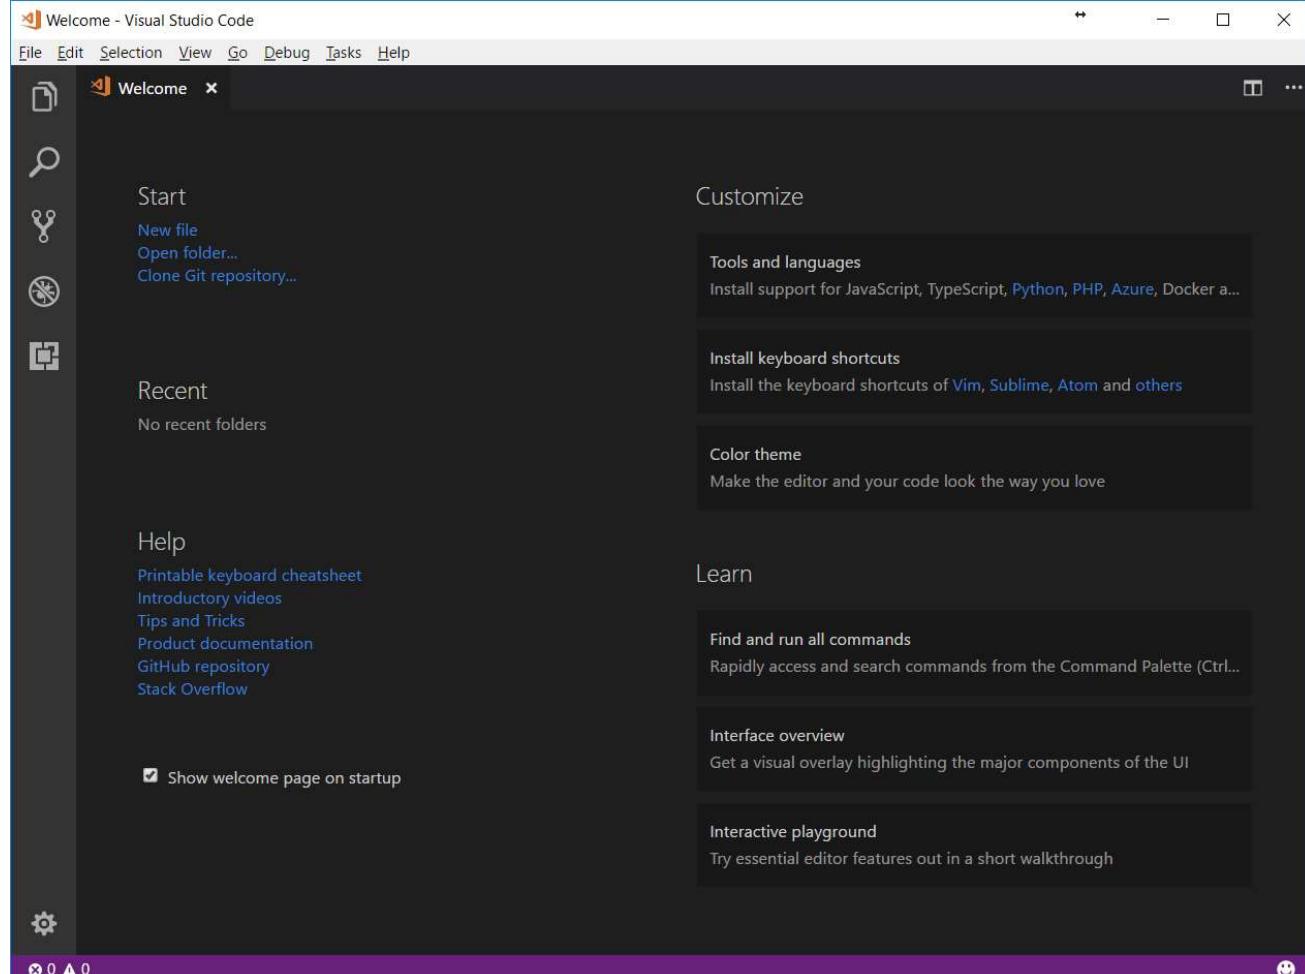

- e.g. d:\testing\testnet-pft

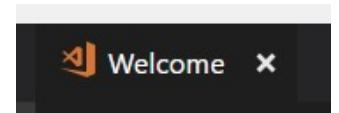

# Start Visual Studio Code

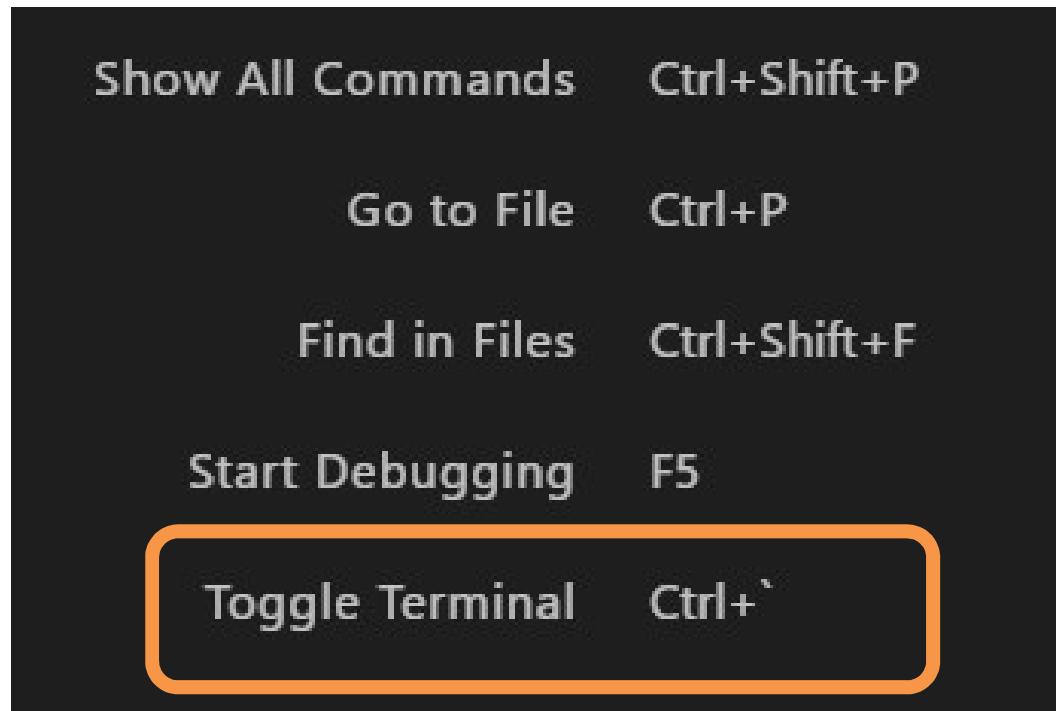

# Start Visual Studio Code

- Start menu...
  - File / Open folder
- Browse to ...
  - d:\testing\testnet-pft
  - and select this folder
- Close ‘Welcome’ tab

# Open terminal

# Open terminal

A screenshot of the Visual Studio Code interface. The title bar shows 'testnet-pft - Visual Studio Code'. The menu bar includes File, Edit, Selection, View, Go, Debug, Tasks, Help. The left sidebar has sections for EXPLORER (OPEN EDITORS: TESTNET-PFT), SEARCH, REFACTORING, and DOCKER (Images, Containers). The bottom status bar shows '© 2017' and a blue footer bar with icons for file operations. The main area features a terminal window titled '1: powershell' with the following text:

```
Windows PowerShell  
Copyright (C) 2016 Microsoft Corporation. All rights reserved.  
PS E:\testing\testnet-pft> █
```

The terminal window is highlighted with a large orange oval.

# Check versions

# Create test folder

- Click new folder icon next to project name in VSC
  - create folder ‘test’
- Right click on ‘test’ folder
  - ‘new file’ => ‘my-first-test.js’

# Add test code

A screenshot of a code editor window titled "my-first-test.js". The file is currently empty, with only a single line number "1" visible at the top left. The rest of the screen is a dark gray background.

## Add test code

- Go to: <https://gist.github.com/erikhpolteq>
- View: pft-01-my-first-test.js
- Click on ‘Raw’

```
pft-01-my-first-test.js
Raw

1 describe('my first test suite', () => {
2
3     it('my first test', () => {
4
5         })
6
7     })
```

- Copy text from browser and paste into my-first-test.js

# Add test code

```
JS my-first-test.js ×  
1  describe('my first test suite', () => {  
2  |  
3  |     it('my first test', () => {  
4  |     |  
5  |     })  
6  |  
7  |})  
8  |
```

- **Save code!**

# Run test

- In terminal
  - `npm test`

A screenshot of a terminal window from a code editor. The window has tabs at the top: PROBLEMS, OUTPUT, DEBUG CONSOLE, and TERMINAL. The TERMINAL tab is active. The text input field shows the command "PS D:\testing\testnet-pft> npm test" being typed. The rest of the terminal window is empty.

# Run test

- 1 test passing!

```
JS my-first-test.js ×  
1   describe('my first test suite', () => {  
2  
3     it('my first test', () => [  
4  
5   ])  
6  
7 })  
8
```

---

PROBLEMS    OUTPUT    DEBUG CONSOLE    TERMINAL

```
PS D:\testing\testnet-pft> npm test  
> testnet-pft@1.0.0 test D:\testing\testnet-pft  
> mocha
```

```

  ✓ my first test  
  
    1 passing (18ms)
```

```
PS D:\testing\testnet-pft>
```

# Run test

- In terminal
  - mocha

The screenshot shows a terminal window with the following content:

```
JS my-first-test.js ×  
1 describe('my first test suite', () => {  
2     it('my first test', () => []  
3     })  
4     })  
5     })  
6     })  
7     })  
8  
PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL  
PS D:\testing\testnet-pft> mocha  
  
my first test suite  
  ✓ my first test  
  
    1 passing (25ms)  
PS D:\testing\testnet-pft> []
```

The terminal window has tabs at the top: PROBLEMS, OUTPUT, DEBUG CONSOLE, and TERMINAL. The TERMINAL tab is active. The output shows the execution of a Mocha test script named `my-first-test.js`. The script defines a single test suite with one test case. The test passes, indicated by a green checkmark and the message "1 passing (25ms)".

# Add assertion

- Above describe:

- const chai = require('chai');
  - chai.should();

- In test

- const x = 5;
  - x.should.equal(4);

- Save code!

```
JS my-first-test.js ×

1  const chai = require('chai');
2  chai.should();
3
4  describe('my first test suite', () => {
5
6      it('my first test', () => {
7          const x = 5;
8          x.should.equal(4);
9      })
10
11  })
12 |
```

# Run test again

- In terminal
  - `npm test`

```

# We have created our first test!

- Using:
  - JavaScript
  - Mocha
  - Chai

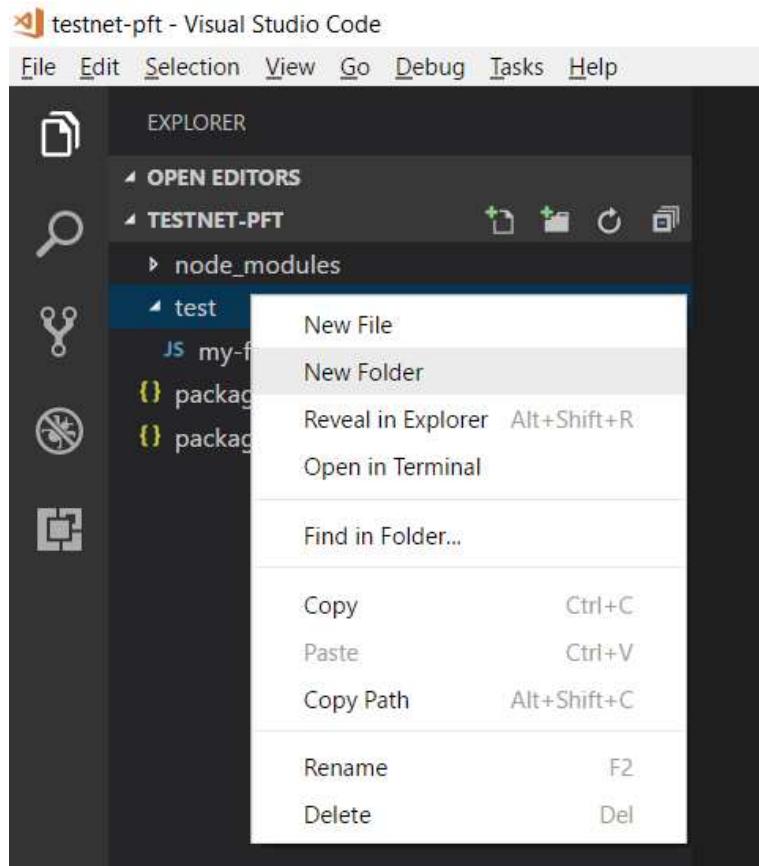

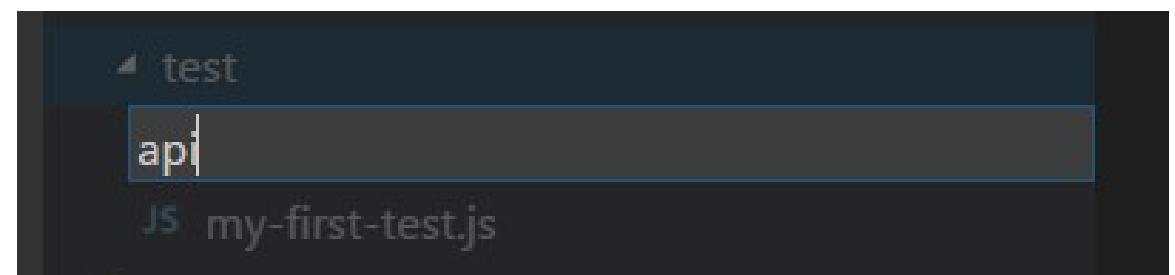

## RESTful API testing

# Create new 'api' folder

- Add new folder 'api' in 'test' folder

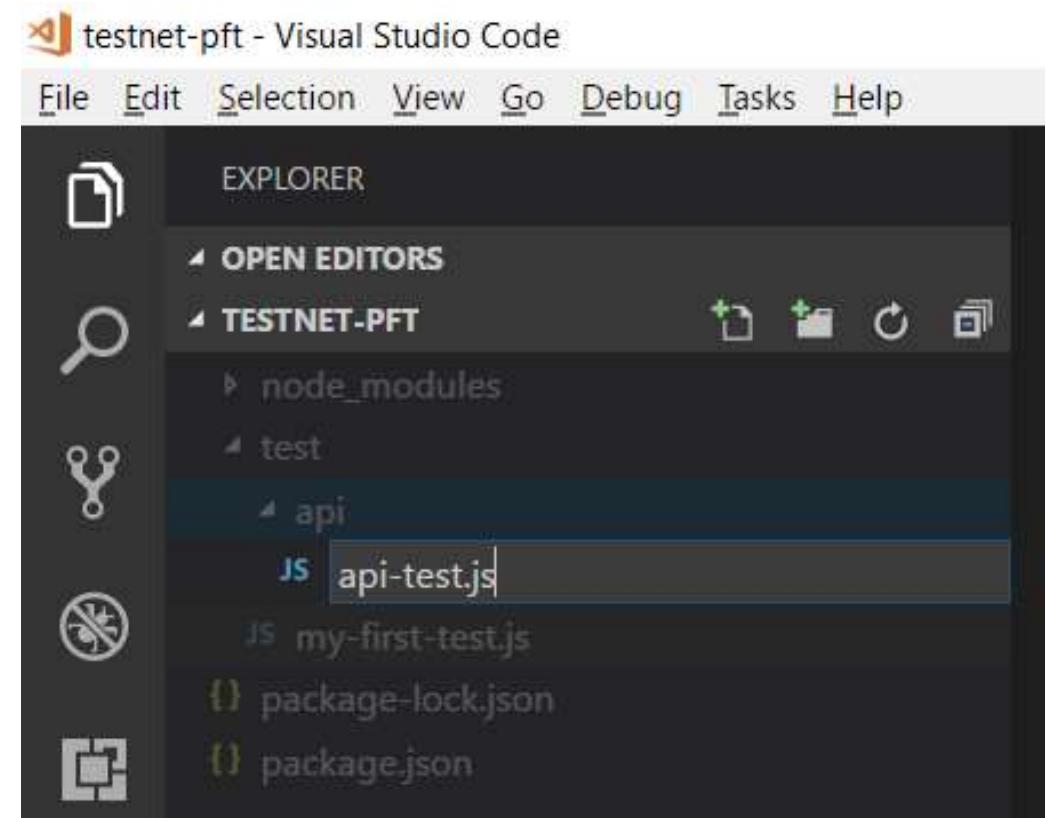

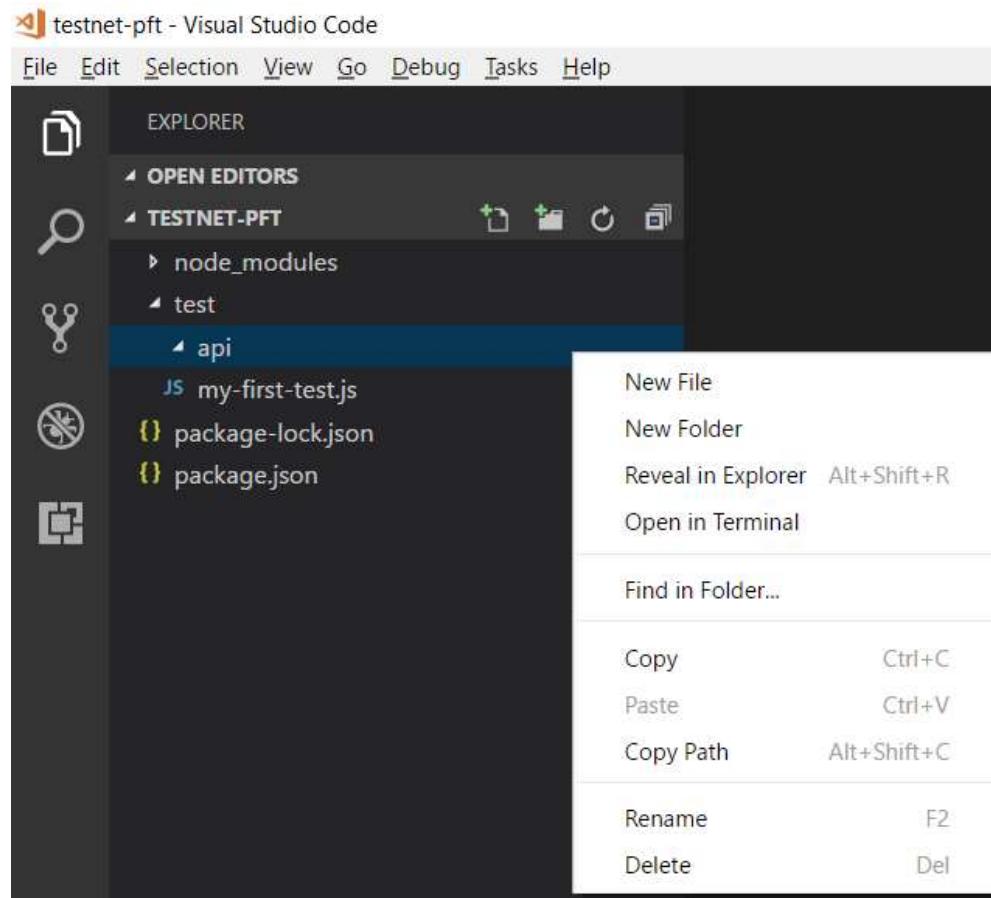

- Right click on 'test' folder

# Add testfile to ‘api’ folder

- Add new file ‘api-test.js’ in ‘api’ folder.

# Copy test

- Copy/paste test from my-first-test

- **Save code!**

```
JS api-test.js ✘  JS my-first-test.js
1  const chai = require('chai');
2  chai.should();
3
4  describe('my first test suite', () => {
5
6      it('my first test', () => {
7          const x = 5;
8          x.should.equal(5);
9      })
10
11  })
12
```

# Run tests

- In terminal
  - npm test

Two code files are shown in the VS Code editor:

```
JS api-test.js ×   JS my-first-test.js

1  const chai = require('chai');
2  chai.should();

3
4  describe('my first test suite', () => {
5
6      it('my first test', () => {
7          const x = 5;
8          x.should.equal(5);
9      }
10
11  })
```

The terminal window shows the command `npm test` being run, which triggers the execution of the Mocha test suite defined in `my-first-test.js`. The output indicates 1 passing test in 12ms.

```
