# **Business Progress Reporting in Agile Context**

Derk-Jan de Grood @DerkJandeGrood TestNet Najaar 2014

#### Goals

- Explain why ordinary progres reporting fails its purpose
- Explain why good reporting enabels us to show our added value
- Introduce the 'subway map'
- Get hands on...

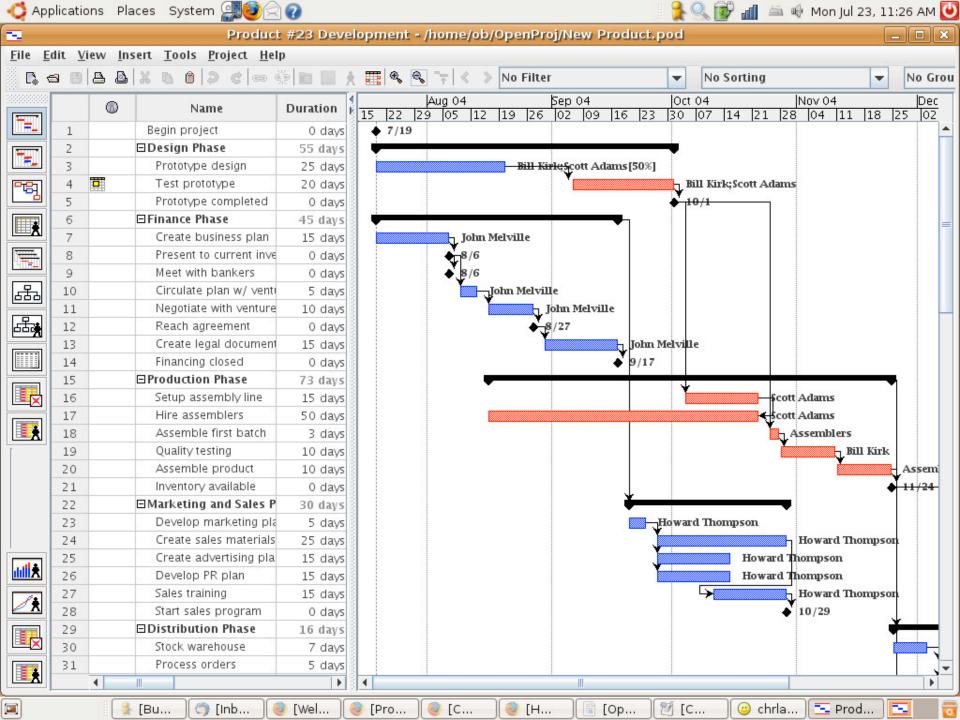

2

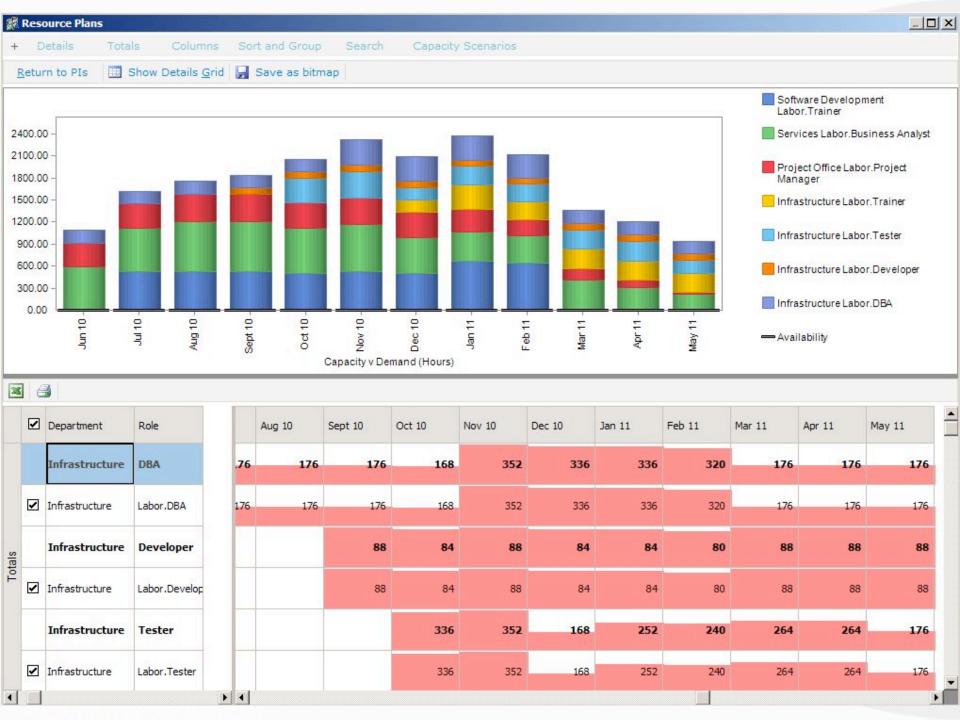

### Progress reporting

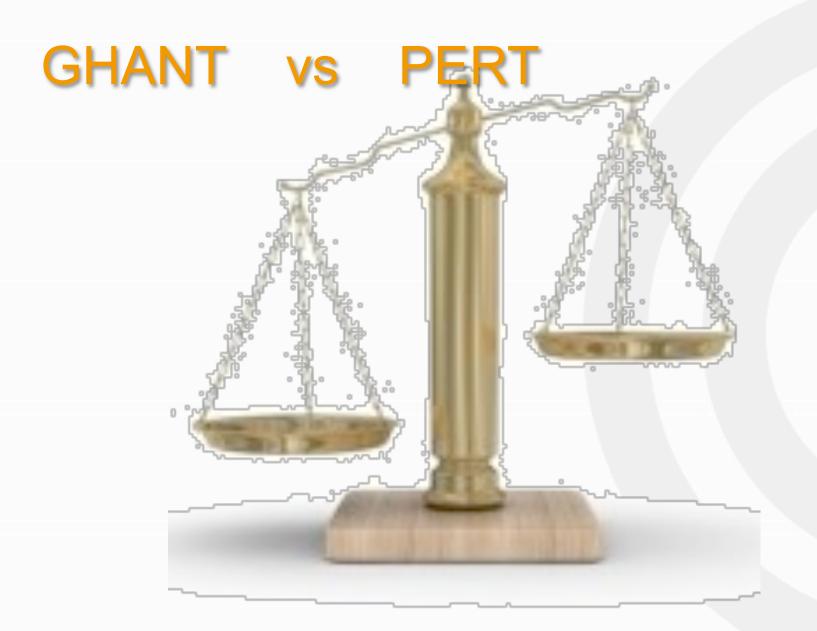

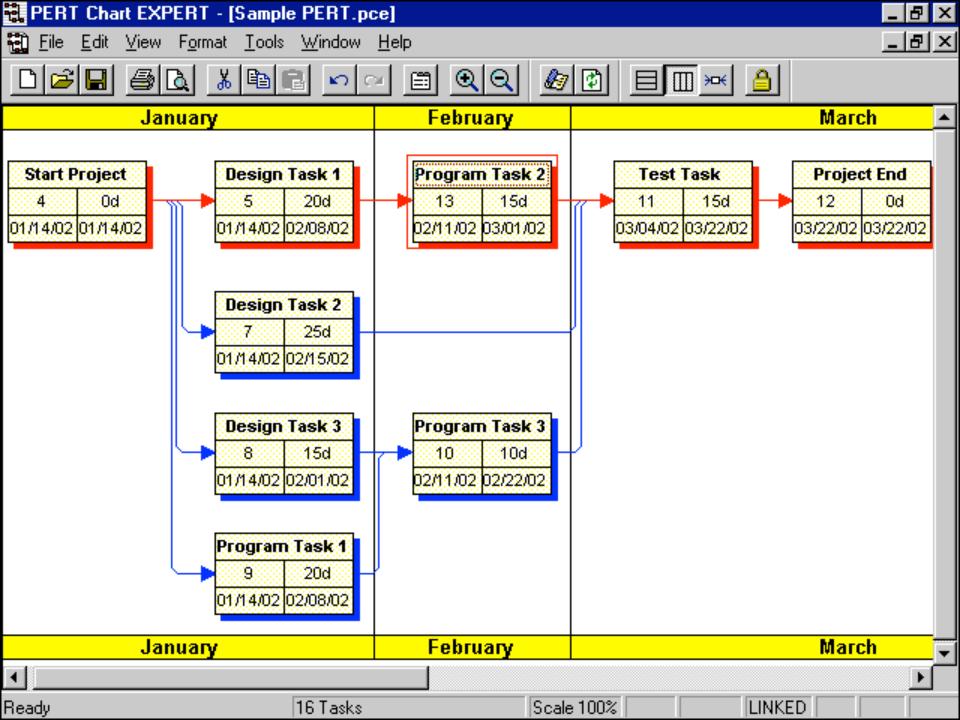

#### Why I love PERT

- Gives a better insight in the relations between activities
- Stimulates managing the critical path
- If made well: shows the structure of the project

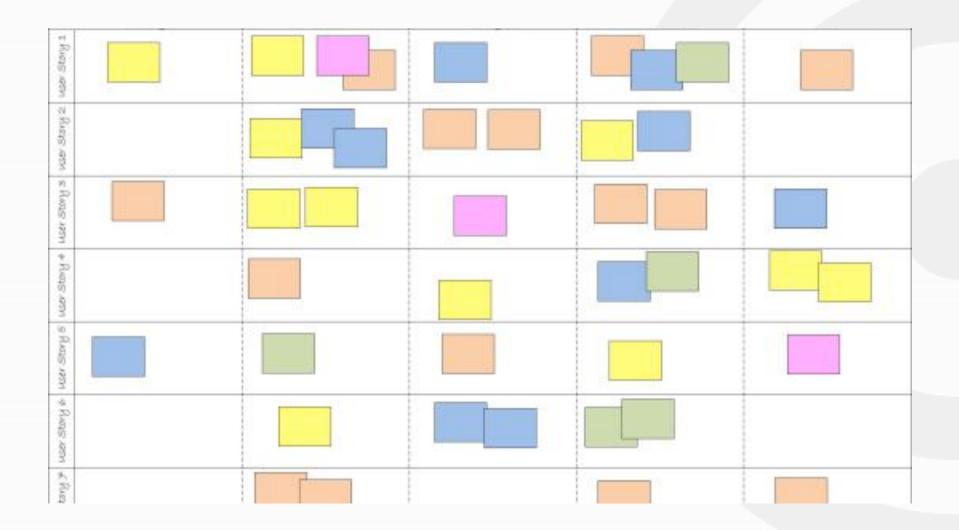

NNOVATION STARTS WITH TESTING

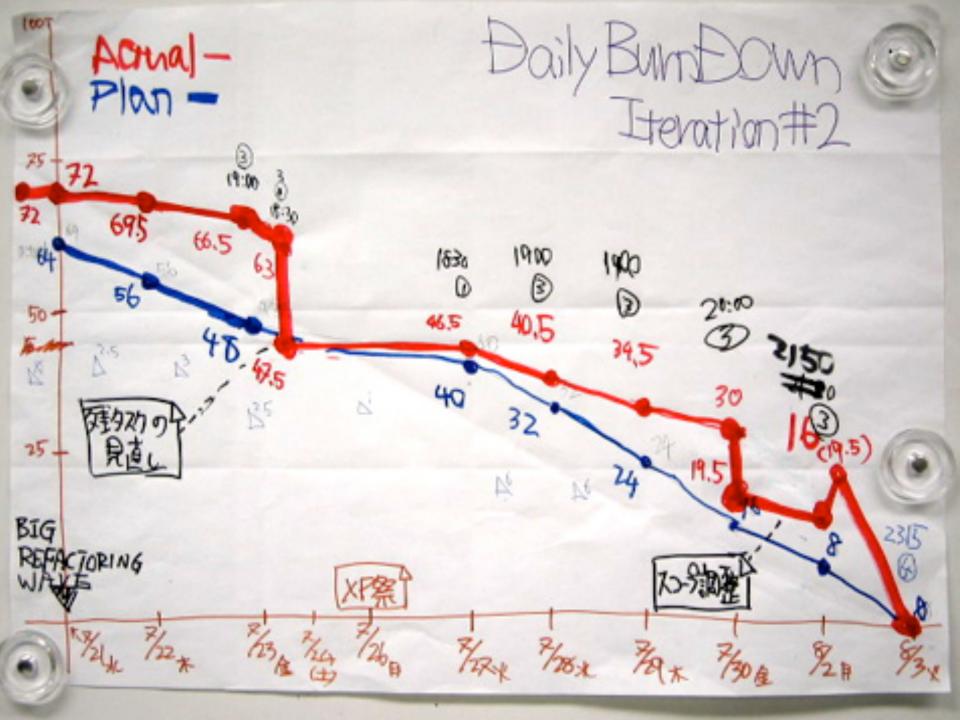

## A whole new game!

#### **SCRUM BOARD**

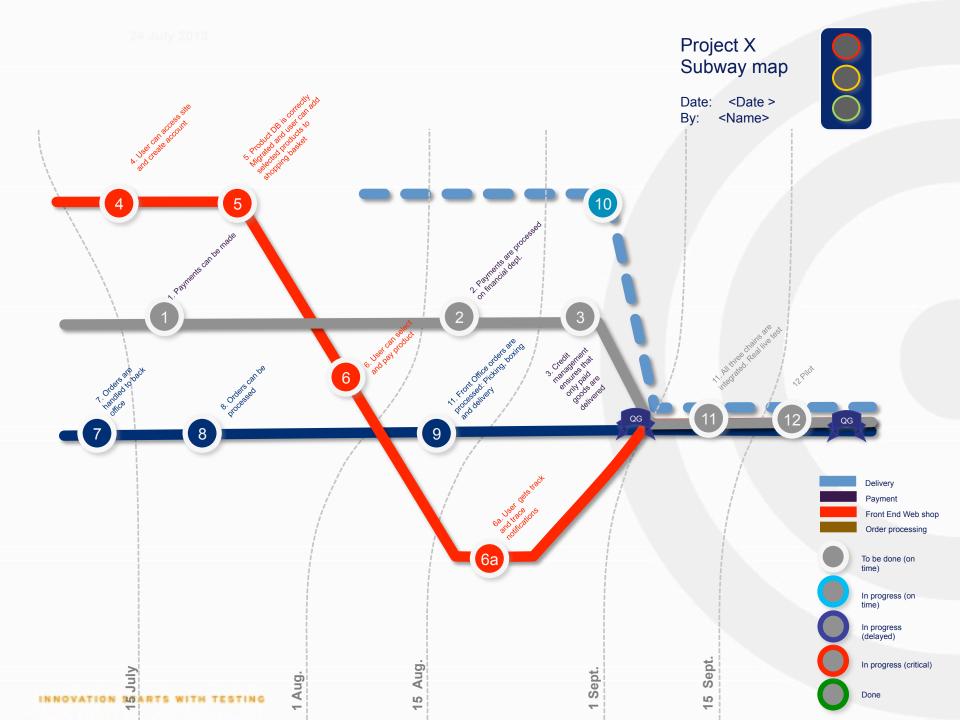

#### Requirements

- Tell about the strategy of the project
- Predict bottlenecks
- Provide progress info
- Each completed step has value
- Visual
- One-pager

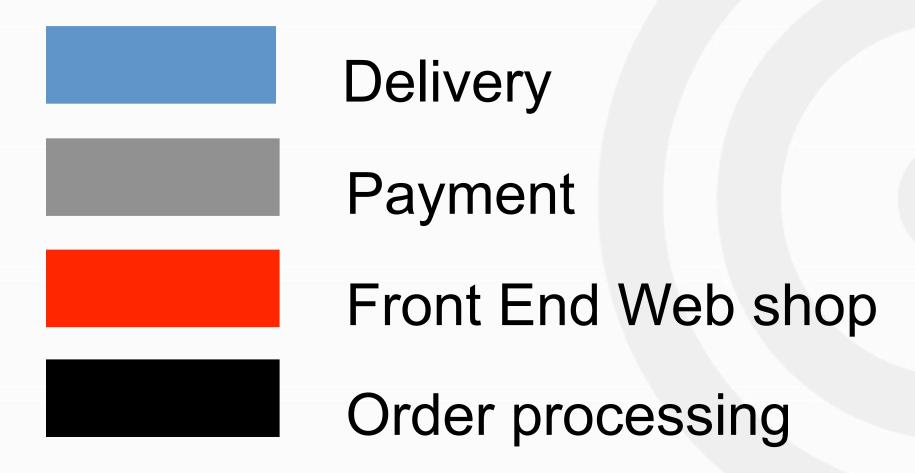

### What's on the SUBWAY map

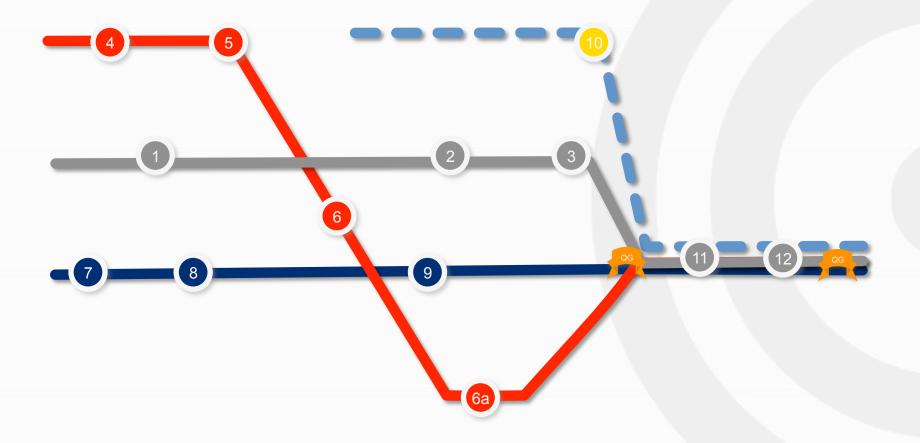

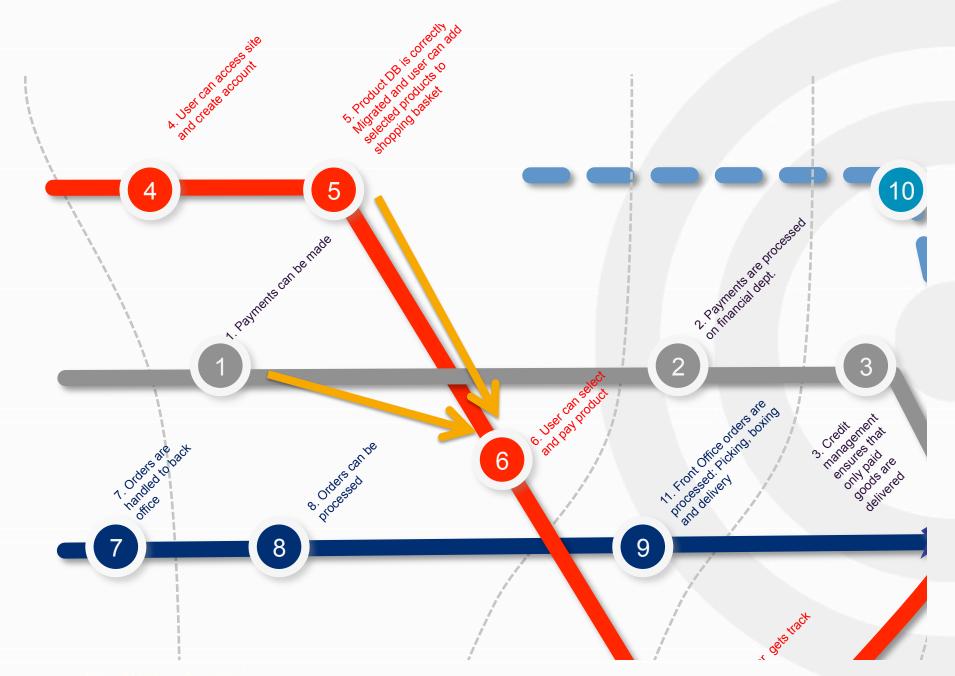

#### Different lines

## **Dependencies & strategy**

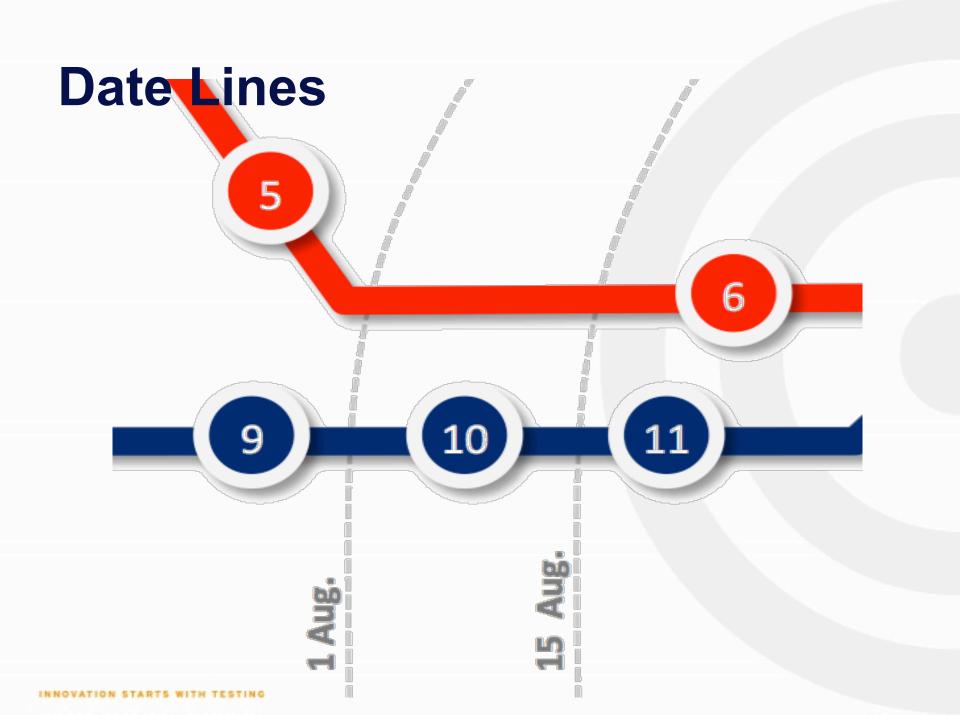

#### Benefit based reporting

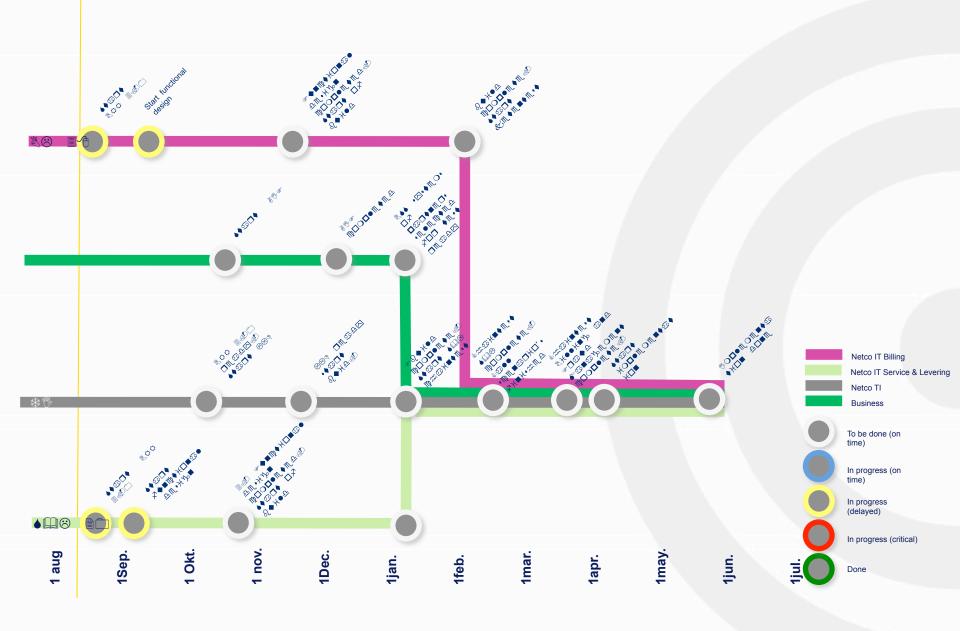

#### Time table

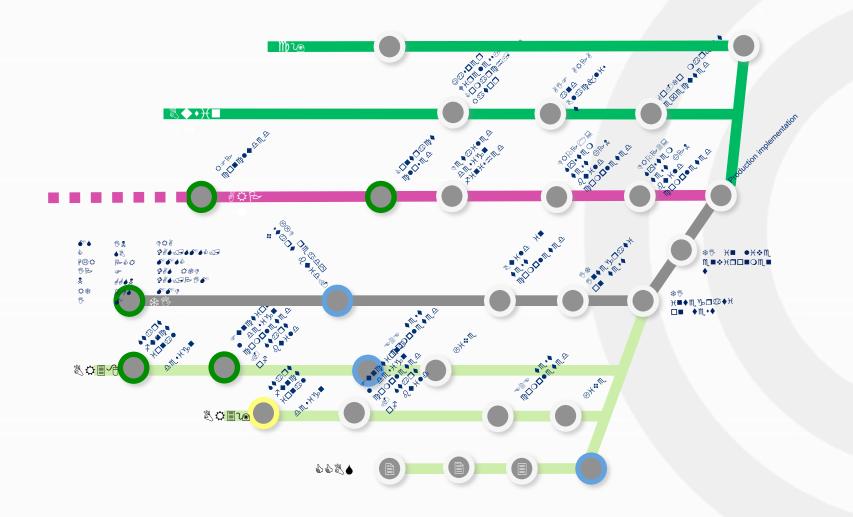

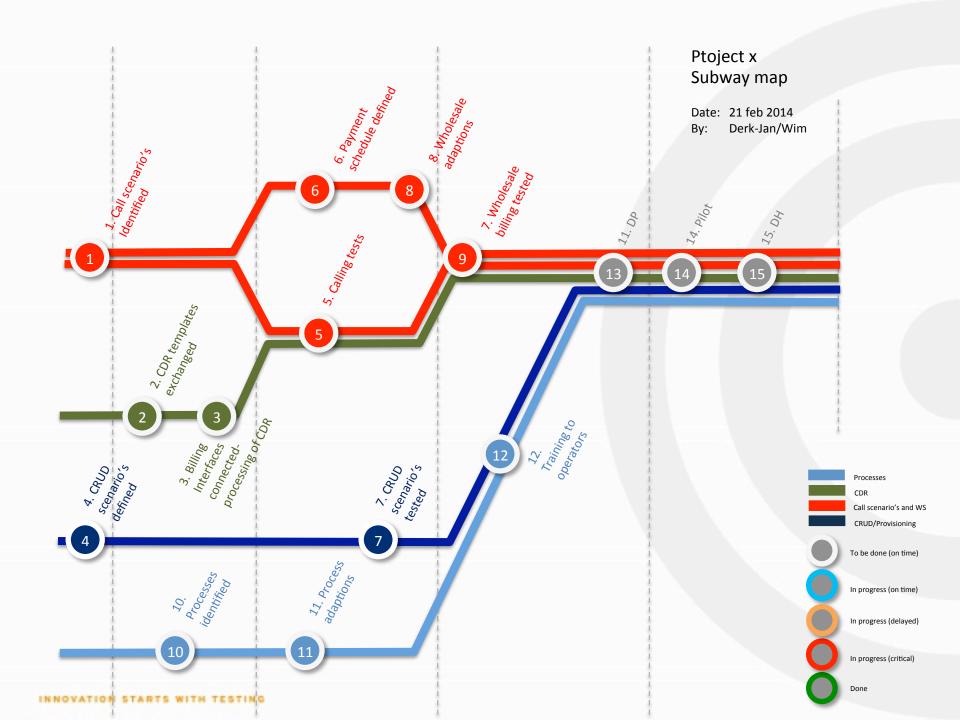

# Bridges

#### Step plan for making one

- 1 Define the lines/threats in your project
- 2 Define milestones or concrete deliverables (MMF), these are your stations
- 3 Investigate dependencies between the various lines, if required make the lines cross
- Place the stations on the line taking into account the dependencies
- 5 Add benefits (what value does it represent) to the stations
- 6 Share your subway map

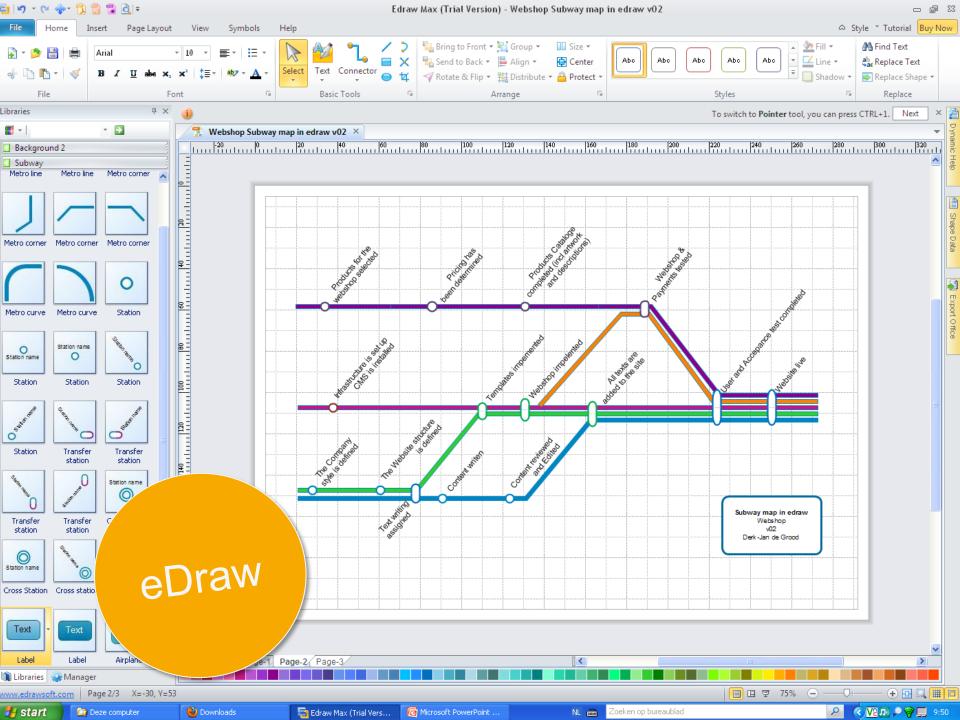

#### DIY: A web shop

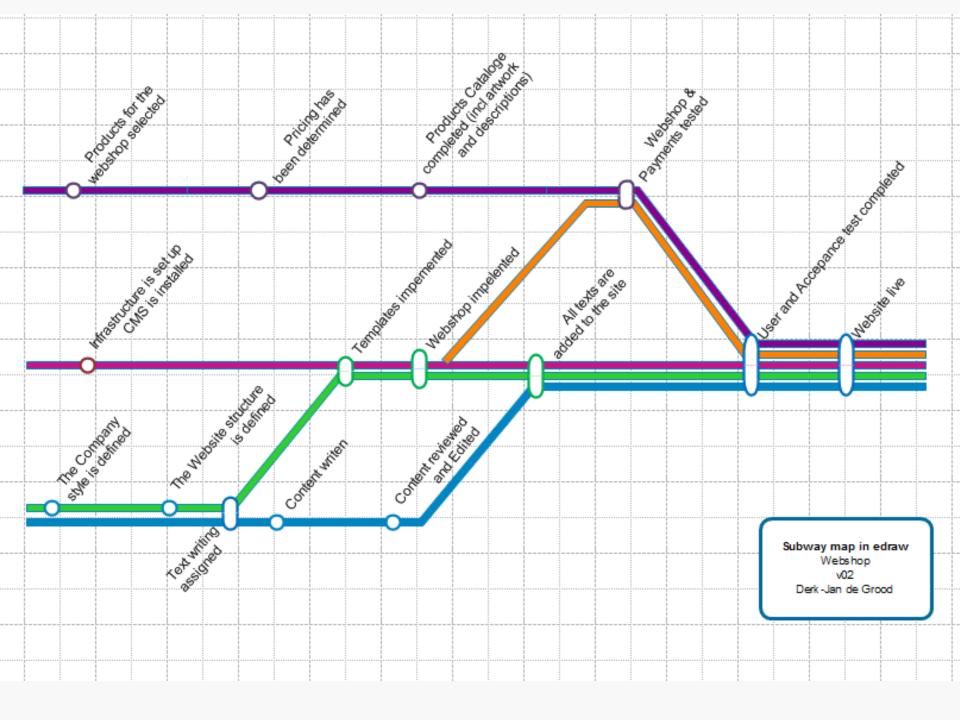

Make a draft subwaymap for the development and testing of a webshop.

- The product group will decide on the assortment, the pricing and will deliver the product catalogue including the artwork and descriptions.
- An external web developer will setup the CMS system and add graphical design made by Marketing.
- Marketing will also deliver the structure of site and the texts for the static pages.
- An User and functional acceptance test needs to be executed prior to going live, but the management loves to have intermediate reports on the progress and quality of the system.
- site in your CMS.

What would your subway map look like?

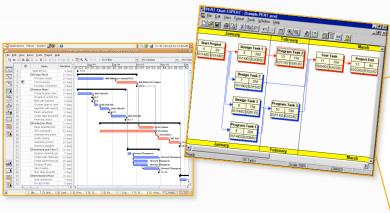

# Wrap Up

#### Requirements

Tell about the strategy of the project

- Predict bottleneck
- Provide progress info
- Each completed step has value
- Visual
- · One-pager

Madrid, 26th to 28th May 2014

#### Why I love PERT

- Gives a better insight in the relations between activities Stimulates managing the critical
- If made well: shows the structure of the project
