## ICTestAutomation with Selenium Webdriver

Koen van Putten  
Nick Hazelaar  
René Hazelaar

1

Introductie

## ICTestAutomation - Process Flow

The screenshot shows the TrendIC ICAssistant software interface. On the left, a vertical navigation bar lists the process flow steps: Requirement, ICAssistant / ICDefine (Import/Define, Run and Test), ICPortal (Create/Schedule Scenario, Show TestRuns), iDashboards (Dashboards), and ICConnect (Defects). The main window displays a central cloud icon containing Microsoft Test Manager, TESTERSUITE (TESTMANAGEMENT MADE EASY), DEFECTSUITE, Quality Center, and JIRA. To the right is a screenshot of the ICAssistant interface showing a test run log with a large black redacted area.

## ICTestAutomation modules

- ▶ **Test definition**
  - ▶ ICAssistant - fast & easy recording and wizard test definition
  - ▶ ICDefine - manual test definition using image recognition & OCR & Selenium
  - ▶ SeeTest - test definition for mobile devices
- ▶ **Test execution**
  - ▶ ICSenario - Scenario builder, Scheduling and Automatic execution
- ▶ **Integration**
  - ▶ ICConnect - Integration with your existing applications
- ▶ **Test reporting & analysis**
  - ▶ Reporting & Analysis
  - ▶ Movie recordings

The sidebar features the TrendIC logo and a horizontal line with three colored circles (green, blue, orange).

**ICTESTAUTOMATION**

## ICTestAutomation & Selenium

- ▶ 9 webdriver functions
- ▶ No coding
- ▶ Compatible with all ICTestAutomation modules

**Test case: Test\_WebDriver**

Function: WebdriverGetText

Teststep: Read Recently modified

Selector: #Contacts\_sideBar\_LBL\_RECENTLY\_MODIFIED

Properties:

- Record Move in ICCConsole
- [Start]
  - [Login] (Global)
    - [add contact]
      - Click text Contact (WebdriverClick)
      - Click button Add Contact (WebdriverClick)
      - Enter First Name (WebdriverKey)
      - Enter Last name (WebdriverKey)
      - Enter Mobile phone number (WebdriverKey)
      - Click Save button (WebdriverClick)
      - Check for Show Full Details (CheckText)
      - Check lastname ok (CheckText)
      - Recently Modified (WaitAndClick)
      - Read Recently modified (WebdriverGetText)
      - Place list modified in testdata file (CopyClip)
      - Read recently Modified (ReadText)
    - [Delete all]
      - click on contacts (CheckAndClick)
      - Select all (WebdriverClick)
      - Click on Action (CheckAndClick)
      - Delay (Delay)
      - Delete all (CheckAndClick)
      - Enter (Enter)
    - [End Segment]
      - End (WebdriverQuit)
  - [End]
- Control Keys: Shift, Control, Alt, Windows
- Text options: Match case
- Mouse Clicks: No Clicks, Click, Double Click
- Mouse Buttons: Left, Middle, Right
- TimeOut: Short, Standard, Long, Custom
- Ignore Flags: Flag1, Flag2, Flag3

# 2

## ICDefine: basisfuncties

## Veelvoorkomende functies in ICDefine

|                         | ICDefine Functions                                              |
|-------------------------|-----------------------------------------------------------------|
| Input                   | Key<br>KeyAndTab<br>KeyAndEnter                                 |
| Action                  | ClickImage<br>ClickText<br>Enter                                |
| Verify\ Synchronization | WaitAndClick(Image)<br>CheckAndClick(Text)<br>WaitStatic(Image) |

## Webdriver functies in ICDefine

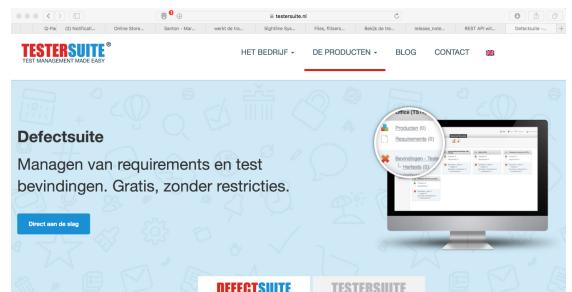

|                         | ICDefine Functions                                                                    |
|-------------------------|---------------------------------------------------------------------------------------|
| Input                   | WebdriverNavigate<br>WebdriverKey<br>WebdriverPOST<br>WebdriverStart<br>WebdriverQuit |
| Action                  | WebdriverFocus<br>WebdriverClick<br>WebdriverGetText ( <a href="#">CopyClip</a> )     |
| Verify\ Synchronization |                                                                                       |

 TESTAUTOMATION

## ICConnect Integration Module

- ▶ REST API web services with JSON support
- ▶ Integration is currently available(tested) with:
  - ▶ ServiceNow
  - ▶ DefectSuite/TesterSuite
  - ▶ Microsoft Test Manager
  - ▶ Atlassian Jira v7 and Cloud v1000.x
  - ▶ TeamCity
  - ▶ Jenkins

## ICDefine: basisfuncties (maak testcase)

 TESTAUTOMATION

## Veelvoorkomende functies in ICDefine

|                        | ICDefine Functions                                              |
|------------------------|-----------------------------------------------------------------|
| Input                  | Key<br>KeyAndTab<br>KeyAndEnter                                 |
| Action                 | ClickImage<br>ClickText<br>Enter                                |
| Verify\Synchronization | WaitAndClick(Image)<br>CheckAndClick(Text)<br>WaitStatic(Image) |

 TESTAUTOMATION

## Segmenten en teststappen

- ▶ Segment bestaat uit teststappen

```

[Start Notepad]
  - Open Run Command (CKey)
  - Typ <notepad> en geef enter (KeyAndEnter)
  - Wacht tot notepad is opgestart (WaitAndClick)

[Typ tekst 1]
  - Geef 2x enter (Enter)
  - Typ <Een goede test verloopt altijd EXACT het>
  - Geef 2x enter (Enter)
  - Geef 1x tab (Tab)
  - Typ <Input - Action - Verify/Synchronization>
  - Geef 2x enter (Enter)
  - Geef 2x tab (Tab)
  - Typ <WaitAndClick (image) en CheckAndClick>

```

- ▶ Zorg voor goede ‘hygiëne’ in je testcase en besteed veel aandacht aan goede benaming van segmenten en teststappen.

## Afbeeldingen

- ▶ Als .bmp opgeslagen in Resources
- ▶ Maak afbeeldingen uniek en klein
- ▶ Denk aan status applicatie/afbeelding:
  - ▶ Selected
  - ▶ Unselected
  - ▶ Mouseover-hover
- ▶ Handig: F8 vanuit venster Image Capture
- ▶ Makkelijker zoeken met Attributes en Filter
- ▶ Maak goede procedure voor naamgeving afbeeldingen!

## Webdriver functies in ICDefine

|                        | ICDefine Functions                                                                    |
|------------------------|---------------------------------------------------------------------------------------|
| Input                  | WebdriverNavigate<br>WebdriverKey<br>WebdriverPOST<br>WebdriverStart<br>WebdriverQuit |
| Action                 | WebdriverFocus<br>WebdriverClick<br>WebdriverGetText ( <a href="#">CopyClip</a> )     |
| Verify\Synchronization | WaitAndClick(Image)<br>CheckAndClick(Text)<br>WaitStatic(Image)                       |

Gebruik CSS Selector of Xpath (Inspect/copy Selector or XPath)

# 4

Opdracht:  
Webdriver  
(maak testcase)

## Opdracht: testcase voor Vtiger CRM

Maak een testcase voor het toevoegen van een contact in Vtiger CRM.

Contact toevoegen in Vtiger CRM

TREND [e]

username:  
user10-user23

password:  
user10-user23

**TESTAUTOMATION**

## Beschrijving opdracht

- ▶ Gebruik Testcase ‘Training’
- ▶ Browser Chrome
- ▶ URL: crmdemo.trendic.nl
- ▶ Contact toevoegen
- ▶ Kies de juiste naamgeving in de teststap omschrijving!

**TESTAUTOMATION**

## Resultaat: Test\_Webdriver

The screenshot shows the Test Automation software interface with the following details:

- Test Case: Test\_WebDriver**
- Properties** pane for the current step:
  - Function: WebdriverClick
  - Condition: Continue on Fail
  - Selector: input#username
  - Wait: Continue as soon as possible
- Properties** pane for the previous step:
  - Function: WebdriverFocus
  - Condition: Continue on Fail
  - Selector: Focus Password field
- Table of Contents** sidebar:
  - ICTestAutomation (ICDefine)
  - Webdriver
  - Test Case Webdriver
  - Introduction
  - Webdriver Function Properties
  - Webdriver Function Description
  - WebdriverAlert
  - WebdriverClick
  - WebdriverFocus
  - WebdriverGetText
  - WebdriverKey
  - WebdriverNavigate
  - WebdriverPOST
  - WebdriverQuit
  - WebdriverStart

# 6

## Afronding en evaluatie

 TESTAUTOMATION

ICTTestAutomation Suite - voor sneller en beter testen!
